Engine	EB0, EB2

FIRST TO MARKET

TIMING COVER GASKET KIT FOR ENGINE EB0/EB2 "ATMO"

This innovative repair solution is First-to-Market.

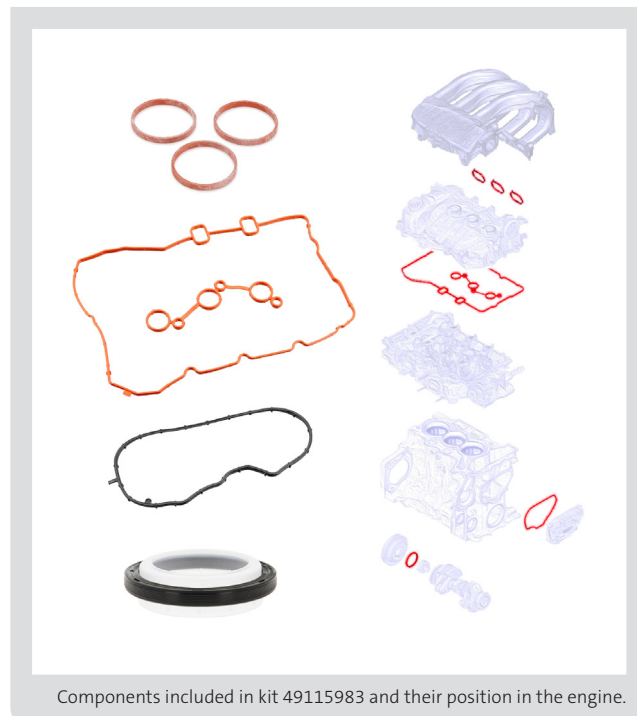

The Corteco team engineered a gasket kit required for the replacement of the timing belt that contains all the necessary gaskets for a quick and efficient change.

The new gasket kit 49115983 suitable for EB0 and EB2 engines matches car models from Citroën, DS, Opel, Peugeot, and Toyota.

PSA Group recommends checking the timing belt with every inspection and changing it after 80,000 km. Not changing the part can lead to a coarse timing belt and particles entering the oil stream. This can result in a blockage of the oil filter.

The maintenance of the timing belt in EB0/EB2 engines requires the disassembly and replacement of 4 different types of gaskets. Not changing for example the upper seals will cause noise due to air leakage.

Don't take a risk – Choose Corteco original quality.
